Students get organized for the second semester of school

Professionals help students order their desks and lockers

January is "Get Organized Month."

Professional organizers from Chaos to Order, a Chicago-land service company, recently visited fourth-grade students in two classrooms at Rogers Elementary School to help students get ready for the second half of the school year.

January is "Get Organized Month." On Jan. 12, which is "National Clean off Your Desk Day," two professional organizers from Chaos to Order worked with Rogers students to help them order their classroom desks, as well as their lockers in the hallway. The professionals also talked to students about how being organized can improve their classroom performance.
